What Do Oakland Students Say About Dual Enrollment?

- ★ "In high school, I took a total of **46 units** at the Peralta Colleges. Now I am a first-year at Cal, and I have quite a lot of **space in my college schedule to take anything I want...**So, I have been exploring other interests, and even a Spanish minor. By the way, all of the CC classes are worth 5 on a 4.0 scale, which **boosted my high school GPA** by a lot!"
- ★ "I believe that Dual Enrollment had a huge impact on my academic career. I attend UC Berkeley and one given benefit of taking community college classes back in high school was that I got to **fulfill certain breadths (courses)** that are required of me in order to graduate college. In my first semester of me being in college, I was technically **considered a sophomore because of how many transfer credits I had accumulated in high school.** This also helped me **save a lot of time and money** that I would have rather spent on classes at UC Berkeley that fulfilled those breadths.
- ★ "The college course has been an amazing experience for me. It gave insight on **what to expect when I actually go to college.** Two thumbs up!"

★ "I think Dual Enrollment should stay in Oakland high schools because it give students the ability to earn college credit as well as the experience of a college class. Being in the dual enrollment class has allowed me turn **learn stuff that hasn't been included in my everyday classes.**"

★ I am a first-generation college student attending the University of California, Merced. I am a rising Junior double majoring in Critical Race & Ethnic Studies and Public Health. I can undoubtedly state that my Dual Enrollment classes in high school helped me excel in my college career thus far. **I went into college with 12 transferable units, which will allow me to graduate a semester early.** Furthermore, dual enrollment allowed me to get exposure to college level curriculum such as homework, group projects, presentations, office hours, midterms and final exams. Overall, **dual enrollment worked as bridge because it provided an easier transition from high school to college**"
